STORY BOARD

This is a story of a 22 year old boy named Bhoru from Noida Sec 53. Who was brought to Trauma Center AIIMS hospital for his treatment by police. He is a only son to his mother and was lost in Noida.

One day Bhoru was with his mother in the market of Noida Sector 53 and just few moments later he lost his mother in the market. Bhoru has some neuro issues as well, so he was unable to recall his mother's name or phone number. In midst of all this, he met with an accident and was brought to

Trauma center AIIMS by Noida police. Here he got the treatment and was handed over to NGO Sapna for further take care. In due course of time, NGO Sapna took care of him and one day he again started to speak Noida sector 53. One of the care giver of NGO Sapna (Rafiq) took initiative to visit Noida Sector 53 to look for some clue. It was morning time and care giver asked one of the MCD worker, is there any home with lost boy. He got to know some location of nearby home and slowly and gradually locals recognized the boy and told the home he used to live in. Care giver

reached the home and it was most amazing day for that family and his father's brother came to pick him up from Anandam and was very happy to receive; as Bhoru was the only hope for his mother after his father's death. Miracles do happen, all we need to have faith.

WE ARE PRIVILEGED TO TAKE CARE OF THE POOR
